A WORD FROM COMPANY

Sahan Hettiarachchi
Founder & CEO

Anushka Abeywardena
Director

Prudence Engineering Services Private Limited is a leading engineering company collaborated with green technology established in 2008. We structure design & technically find best possible green & sustainable solutions for wide range of water & waste water purification systems. The company is recognized by CEA as a consultant for waste water purification systems since 2017. We are specialized in swimming pool constructions equipped with CIDA grading C-6 for construction. We provide industrial solutions for pumping high viscous, high abrasive, high corrosive & high toxic chemicals or solutions with ATEX certified pumps.

VISION

To be recognized as a pioneer solution provider for water technologies and multi-disciplinary field of engineering blended with sustainable techniques which will drive Sri Lanka to a circular economy.

MISSION

Catering the requirements of the client to the almost satisfaction by providing latest technology fusion with highly environmental friendly methods.

WATER PURIFICATION SYSTEM

DRINKING WATER

70% of the planet is covered by water bodies. but freshwater we consume to drink, bathe in, irrigate our farm fields is only 3%. As a result, 1.1 billion people worldwide lack access to usable water.

Many of the water systems that keep ecosystems flourish and feed a growing human population have become stressed. Rivers, lakes and aquifers are drying up or becoming too polluted to use. Agriculture consumes more water than any other source and wastes much of that through inefficiencies. Climate change is varying patterns of weather and water around the world. causing shortages and droughts in some areas and floods in others.

We prudence engineering offer tailor made water filtering system solutions challenging the available water quality blending with latest technology whilst promoting wise use of available water resources leading to sustainable water use best practices.

Our clients are spread over domestic individuals, communities, agriculture sector and factories who manufacture food & beverages, tyres, pharmaceuticals, tiles & bath-ware, milk, activated carbon, hotels & restaurants, supermarkets, shopping malls, fabric dyeing & garment and any industries who consume water for production on day today uses.

WASTE WATER RECYCLE SYSTEM

Water is high tendency to pollution. Water is able to dissolve more substances than any other liquid on Earth. It's also why water is so easily polluted. Toxic substances from farms, towns, and factories readily dissolve into and mix with it, causing water pollution.

08

We Prudence Engineering specialized in waste water reclamation and restoring systems. Our designs include tailor-made solutions for wastewater purification for a broad range of customers from domestic to industrial scale. Our very own expertise and over decade of experience allow us to design any system using the highly advanced technology and carry out the building, installation, commissioning and maintenance works.

we guide our customers for ISO14001;2015 Environment Management Systems certification through continuous improvements of waste water treatment plants by reducing power consumption, monitoring & controlling systems upon careful assessment of client's requirement and scope.

INDUSTRIAL PUMPS

We prudence engineering cater total industrial pump solutions partnering with world-renowned brands Injecta, Fluimac, and Sonho. Selling the product is not our passion, but we always insist our clients with optimum use of a pump with less energy steering for sustainable economy.

We always fulfill clients' needs on selection of pumps highly concerning safety, technical feasibility, longevity and economic viability for a long-lasting solution. Products under our exclusive authority as distributor are furnished with many health and safety standards such as ISO standards, CE conformity, ATEX, and FDA compliant, EC conformity and many others.

For Chemical Dosing

We are the sole agent for Injecta, a high-quality Italian dosing pump brand trusted worldwide. Since 2008, we have provided reliable solutions for water treatment, chemical dosing, and industrial applications. With continuous stock availability, we ensure quick access to the right products, reducing downtime. Trusted by many industries, Injecta stands for performance, durability, and innovation.

- ✔ Solenoid-driven dosing pumps
- ✔ Motor-driven dosing pumps
- ✔ Peristaltic dosing pumps
- ✔ Piston pumps
- ✔ Digital dosing pumps

For Chemical Transfer

Since 2019, we have been the exclusive distributor of Fluimac in Sri Lanka, delivering high-performance pumping solutions for various industries. Fluimac specializes in handling highly difficult fluids, ensuring safe, efficient, and durable fluid transfer in demanding environments. Designed with European technology, these pumps offer superior chemical resistance and reliability for industrial applications. Our commitment to continuous stock availability guarantees quick access to the right solutions, minimizing operational delays. With a strong reputation for quality, Fluimac pumps are the trusted choice for many industries.

- ✓ Air operated diaphragm pumps
- ✓ Drum pumps
- ✓ Chemical mixers
- ✓ Magnet pumps

Submersible Pumps

SONHO is a leading Taiwanese manufacturer of submersible pumps, backed by over 25 years of expertise in the industry. Known for high-quality stainless steel construction, SONHO pumps deliver exceptional durability, corrosion resistance, and performance in demanding applications. Designed for efficient water transfer, drainage, and wastewater management, these pumps ensure long-lasting reliability in both industrial and commercial settings.

High Pressurized Pumps

CNP, a trusted Chinese brand, offers a wide range of stainless steel pumps, including horizontal, vertical multistage, and centrifugal pumps. Designed for efficient water transfer and pressurization, they are ideal for booster systems, RO plants, hot water circulation, washing systems, and high-pressure flushing applications. With corrosion-resistant stainless steel construction.

- ✓ Centrifugal pumps
- ✓ Horizontal multistage pumps
- ✓ Vertical multistage pumps

SWIMMING POOLS & PONDS

When it comes to swimming pools and backyard dreams, hundreds of homeowners have trusted Prudence Engineering Team. Our sales & construction team specialize in building and remodeling concrete pools.

Pool-design options include rock waterfalls, pool fountains & water features, pool mosaics, pool lighting, pebble finishes, and colored quartz interior finishes. Whatever suits your taste and budget, you can have the original pool & spa you've always wanted with an inspired Prudence Engineering design, constructed with superb local craftsmanship and money-saving technology.

INDUSTRIAL AUTOMATION

We prudence engineering perpetually encourage our clients to automate their existing water, waste water treatment plants and industrial swimming pools. Plant automation is benefitted with remote access, more efficient use of materials & energy, better product quality, improved safety, less labour and reduced process lead times. We do customized design & installation of automated PH controller systems, conductivity controller systems, turbidity controller systems, free residual controller systems, turbidity controller systems and dissolved oxygen controller systems. All systems are 100% designed by Sri Lankan engineering experts in fusion with Injecta an Italian made controllers. We install online BOD/COD controllers partnering with BOQU instruments first ever online BOD/COD analyzer system in Sri Lanka. We use fully featured visualization software (SCADA) which is used to monitor, control the water treatment plants through graphical user interface display.

FILTER MEDIA

We are collaborated with SUNRESIN the largest resin manufacturer in China for ion exchange resins. We are keeping stocks of cation resin, anion resin, mixed bed & OM resins manufactured by Sunresin.

We provide turkey solutions supplying special resins for wastewater from production of Dyestuff, Pesticide, organic chemicals, and heavy metals from electroplating industry.

With a wide product range, products are highly effective for the extraction of Saponin, Stevia, Flavonoids, Alkaloid, Polyphenol as well as the pigmented color and impurities removal from herbal extract.

We are having stocks and capacity to supply all filter media related to water and waste water purification plants locally and overseas market as well.

- Activated Carbon - High Iodine Index for Drinking Water Plants
- Anthracite - high carbon content, durability, and excellent filtration capacity with longer filter run times
- Graded Silica Sand - with customized mesh sizes
- Calcite - with customized mesh sizes
- Dolomite - with customized mesh sizes
- Green Sand - ferrous removal media

R & D TRAINING

We continuously carry out research, development and trainings to our customers and to our own team with the help of experienced professionals in the field to strengthen the knowledge and update with latest technologies in water and waste water purification field. We use exhibitions and training programs to transfer technological know-how to potential clients and especially for young generation of our country. We earnestly encourage our foreign suppliers to share technologies and we have conducted several technical meetings to our prestigious clients with foreign principals.

CUSTOMER CARE

Our products and services are awarded with unparalleled warranty after sales. Our showroom at Papiliyana welcomes our customers with information, complaints and questions. Order receiving, invoicing, & processing are key operations at our showroom. We are happy to announce that, our team of technical sales are willing to help you out operating hotline 24 hours 365 days. In addition our technical team is willing to help you out 24 hours 365 days for any matter arising with the products or services rendered by Prudence Engineering team.

Recommendation letter
To Whom it may concern,

We are giving this recommendation letter in good faith to our Supplier, Proforce Engineering as a result of their excellent performance in Design, Construction, Installation & maintenance of Sewerage/Waste Water Treatment plant at our facilities which "The Star Beans".

The breadth and depth of their knowledge combined with a proven reliability qualifies them to implement our project successfully.

Given our experience from the above project with Proforce we are happy to recommend them as a supplier of professional services in water treatment industry.

Yours Sincerely,

A.N.M. Wahneema
